Congratulations on completing the career assessment test. Find below the personalised AI based career report, specifically designed depending on your interest.

www.pickmycareer.in

Why career guidance is important?

Our career Assistance framework and assessment test have been carefully curated by a team of career experts, Psychologists, Psychiatrist, researchers and data analysts around the world. Since 2014, we have been working with top institutions, professionals, and industrial experts to curate student aids that help and educate students to prepare themselves in finding their interest in education. With the help of advanced technologies available, our career assessment tests have a high accuracy and the credibility ranks high. Our conceptual career assistance framework is based on cognitive behavioural theory, that majorly associates to find the accurate career match for you. It is custom made with 4 major fields like Orientation, Interest, Personality, and Aptitude.

[About](#) [Videos](#) [Career Library](#) [Our Pricing](#) [Log in](#) [Sign up](#)

Why do we test these and how these factors help us find your best career matches?

It's of great importance to know you based on these factors, as it defines the exact person you are. Now that you have completed your assessment successfully. This report will provide your result based on all the 4 factors.

So let's first see what the factor Orientation has to say about your inner strength and your approach with the society!

Orientation

A person's Orientation skills define his basic attitude towards a situation, decision, event, task, interaction with people, what drives him, which influences his working style highly. So in this part of the assessment we assess a person's orientation skills based on four main categories: Management, Informative, Creative and People.

For example, consider if you are running an Organisation which design, manufacture and sell footwear like Nike or Adidas, you need all these four sets of people:

1. People with **Administrative skills** can manage targets and deadlines, manage projects and tasks, manage people and teams, manage finance and accounts etc
2. People with **Creative skills** can design footwear with world class style and create top trending designs.
3. People with **Informative skills** can effectively access or research the information available and adopt new methods to manufacture futuristic footwears using technology.
4. People with **People skills** can provide solutions for the problems and needs of the people. This is because they have the ability to mingle well, make deep casual interactions with the people around.

In order to run an organisation all these sets of people should work together in which you must find your core area of strength and this assessment will help you to find out your Dominant orientation skills.

People

Information

Your Orientation Report

Your Admin Style

It is ok to be in this state you are someone who can carry out tasks as per plans assigned to you perfectly but generally step back when asked to create a plan on your own. You are uncomfortable to take responsibility when working together as a team. You always seek help from others to solve your problems and this is not wrong in any case. As improvement in these areas comes only with experience and exposure to such situations.

Your Creative Style

You are artistic and see the beauty in things around you. you always come out with different new ideas on plans and arrangements. You are independent and open-minded but also sensitive . You love to perform and entertain people. You are good at making crafts and experimenting. You are a deep thinker and have a realistic approach to life.

Your People Style

Alone you can do so little, together we can do so much.! Your score indicates that you are comfortable only with your own company and fall more under the introvert category.

Your Informative Style

There is still room for improvement! You lack the ability to interpret things. You are averse to changes.

We believe, now you have understood your strength and working style. Let's move on to the next factor Interest which defines the fields that fascinate you and those that you love spending time or work with.

Your Interest Report

“What am I passionate about?” “What am I going to be?” These are the most difficult questions one has to face while they decide to pursue their higher education. Choosing a career based on your interest, will put your heart & soul to develop your skill sets and succeed in your career. But the problem is most of us don't have a clarity or clear vision about our interests.

Don't worry! We are here to give you a clear picture about your interests and passion hiding behind your head & heart, this part of the assessment will find out your core interest areas and suggest 4 to 5 main stream career options out of 25+ career streams where you will have a high chance of achieving success. This section will help you identify what work areas excite you and helps you identify and understand the multiple career options which are personally rewarding.

So this is the core part of your assessment and please analyse the test results of this part carefully.

We hope that now you are aware of your passionate fields. Now, its important to know about your Personality as it conveys your uniqueness with others. Please read further to explore more about your personality, strengths and the characters that you can improve to shine well.

Personality

Personality is made up of characteristics like how you treat (behaviours) yourself and others, how emotional you are and the levels you can deal (comfortable) with people's emotions, your ability to understand and acquire knowledge from others, your experiences. In simple terms the traits that make you unique is personality and it has a lot more to contribute to your work and profession.

It's as important as the other factors like orientation and interest to know about your personality and to pick a career that compliments your personality.

Your Personality Report

Congratulations! Be proud to have a personality match with this iconic man of India, **Dr. B R Ambedkar**

B R Ambedkar - social reformer, economist, jurist, politician

Dr. B.R Ambedkar was a champion of Human rights who fought against social discrimination. He worked extensively for the welfare of untouchables and downtrodden. He is also known as the architect of Indian constitution and founding father of Indian republic. He also worked for the rights of women and labourers. He was the first Indian to get a doctorate degree (Ph.D) in Economics from London.

Lets see how he matches your personality!

1. You are Warmhearted, genuine, conscientious, and cooperative.
2. You are a True extrovert, social, sensitive, helpful, more popular.
3. You are Loyal, follow through even in small matters.
4. You Prefer to live in the real world than in imagination.
5. You observe the needs of the others in their day-by-day lives and try to provide and make them comfortable
6. Like closure and prefer structured, organized situations in which warmth and compassion are shown.
7. You are best in organizing people to get a job done.
8. You Want to be appreciated for what you contribute.
9. Extremely organized and has difficulty dealing with uncertainties.
10. Like to work with others to complete tasks accurately and on time.
11. You are a good motivator at times and help people to recover emotionally.
12. You like to revel in the spotlight, and are primarily focused on organizing social events for their families, friends and communities.
13. You want to be the center of attention but also like listening to what other people have to say.
14. Often see things in terms of black and white, right and wrong, and they are typically not shy about sharing their evaluations of others' behavior.
15. You put your best interpersonal skills to work to organize people and processes.
16. You Enjoy work that allows you to see results, and prefer a high degree of structure and organization.
17. You gain satisfaction from completing tasks with attention to order and detail.
18. Usually prefer to work with others, and are energized by participating in a motivated, conscientious, action-oriented team.

Areas of improvement:

1. Judgemental

Judgemental is assuming something prior based on your underlying idea that you have about a person or a thing. It's good to judge and analyze a situation or an incident to understand it. But being judgemental mostly would make you regret because there is more chance that you could be wrong. It's always good to analyze rather than presume.

2. Needy

As humans, we all need support and comfort from others, but when it goes overboard, this might tend to develop some unhealthy habits in you like lack of independent thinking, indecisive and submissiveness that might slow your productivity.

To overcome this character, in the first place take charge of your situations on your own. Be confident and know your self worth. Every step may not be right, still try to make decisions independently and learn from failures. The more you focus on improving and trusting yourself, the sooner you'll overcome this character.

3. Lack of creative thinking

Creativity is the way you let your brain run freely and get ideas that are different from the usual stereotypes. People become more creative because they let themselves think and feel things differently. Involve yourself in solo or group activities that challenges and enhance creativity. This helps your brain to activate your creative abilities. Start infusing creativity in things you love.

4. Lack of adaptability.

It's good to be stubborn at times. This quality can sometimes help you showcase your strengths and capabilities. But if that's being an obstacle for your growth, then you have to make some adjustments for the sake of reaching your goal. Did you know? Being adaptable is the best quality most successful people have.

By now, you must have got a clear picture about yourself and the careers that would match your personal self. It's also necessary to see where your knowledge gained over these years stands at this point. So move on to the next section and see the areas of strength. (Ignore this if you belong to Class 8,9,10. You can move on to check the consolidated report)

Career Match with Animation, Graphics & VFX

The animation is an umbrella term, comprising moving imagery, including everything from cartoons to Claymation. Animation involves the process of drawing, designing, silhouettes, and preparation of photographic sequences that are integrated as one, to form motion and these are used in multimedia and gaming products. It is the process of adding a sequence of still images to generate the illusion of movement. An animator is the one who creates animations. They use various computer technologies to capture the still images and then animate those in their desired sequence. And now, visual communication as a course is about combining arts and technologies to communicate ideas. It begins as a message, that travels from the talented designer, to get transformed into visual art, which is more effective than verbal communication. Visual aids are more attention-grabbing and engaging for all types of audiences. These 3 streams hold a wide range of courses and job opportunities where some are graphic and web designer, Advertising, Video editor, Photojournalist, Art/ design director, communication manager, design education, etc.

Career Match with Sports

A professional career in sports is a long-time activity intended on accomplishing goals in a sport and harmonious enhancement of the achievement for the proper material compensation. Expertizing these activities are very much time consuming but necessary for gaining the required skills and physical condition. Certainly, not everybody sees sports as some sort of activity worthy of full-time attention. For most people, it is just a type of hobby, recreational activity and not something that is worthy to be called a career. However, professional athletes are much likely to fill up the list of highest-paid individuals globally. You will have to develop a serious physical capability and the passion for the job to be on the right way, as triumph here is strictly a derivative, which comes later when a whole lot of elements combine in a perfect puzzle. The sporting sector is mainly based on the fans and spectators. Most sports events are forms of entertainment where they all are played in front of a mass audience and provide people with happiness and excitement.
